Homeowners Ralph and Linda Sweeney, say the bridge, where they stand, challenged builder Luis Machado of LEM Construction in Elizabeth; glass blocks are set into the level platform of the walkway. Designer Mark Polo put comfy seating in the office and beyond, in a living area with a T.V.

Linda Sweeney wanted the television above the 40-foot-long pool for her water-aerobics workout video. A control panel activates waterfalls on each side of the bridge, which leads to the back yard. Source: Omega Pools in Toms River.

A baby grand piano sits just inside the entrance to the pool room. Jingo, one of the family's dogs, sits on rug nearby.

**Adjustable office shelves house electronic gear and collectibles.
Mark Polo designed the desk.**

**Lush planting fill the property that backs up to the addition.
An elevated deck contains an outdoor spa; a koi pond is tucked between the deck and addition.**
